

SMG Preop ECG Testing Guidelines

Based on the ACC/AHA 2007 Guidelines on Perioperative Cardiovascular Evaluation and Care for Noncardiac Surgery

Downloaded from: circ.ahajournals.org/cgi/content/full/116/17/e418 on 3/22/2010

* ECGs should be done within 30 days of the planned procedure

† Patients with moderate or worse aortic stenosis and poor exercise tolerance (less than 4 METs) must have an echo within 6 months of any surgery of intermediate or greater risk
